

WORD • POWERPOINT • EXCEL

DOC NO. RL-BRAND-001-OFFICE-A REV. A RIPOSTE LABORATORIES

Office has a real theme format, so unlike Google Workspace you can set this up once properly and hand the theme file around.

CONTENTS

▶ 1 • Font	2
▶ 2 • Build the theme	3
▶ 3 • PowerPoint	4
Slide masters to build	4
Shape defaults	4
Tri-band	5
▶ 4 • Word	5
▶ 5 • Excel	6
▶ 6 • Checklist	6

SEC.01

1 • FONT

Install **JetBrains Mono** (400 / 700 / 800) on every machine that will open the file, or **embed it** – Word and PowerPoint both support font embedding, and the SIL OFL permits it.

File → Options → Save → Embed fonts in the file (Windows). On Mac, embedding is unavailable in some versions – export to PDF for distribution.

Fallback if you can't install: Consolas, which ships with Office everywhere. Note the substitution.

SEC.02

2 • BUILD THE THEME

Page Layout / Design → Colors → Customize Colors...

THEME SLOT	COLOUR	HEX
Text/Background - Dark 1	Ink	#1D1A17
Text/Background - Light 1	Bone	#F6F1E7
Text/Background - Dark 2	Ink Head	#2B2723
Text/Background - Light 2	Bone Dim	#EAE4D6
Accent 1	Pink	#F0477D
Accent 2	Marigold	#FE9A0D
Accent 3	Teal	#12B795
Accent 4	Pink Deep	#D81150
Accent 5	Marigold Deep	#A15E01
Accent 6	Teal Deep	#0C7A63
Hyperlink	Pink Deep	#D81150
Followed hyperlink	Teal Deep	#0C7A63

Accents 1-3 in that order **is** the rotation rule – Office cycles them automatically for chart series and SmartArt, which means charts come out on-brand for free.

Then **Fonts → Customize Fonts...** → both heading and body **JetBrains Mono**.

Save as **Riposte** (.thmx) and distribute it. It applies to Word, PowerPoint and Excel.

SEC.03

3 • POWERPOINT

Widescreen 16:9. Background #F6F1E7, text #1D1A17.

ROLE	SIZE	WEIGHT	CASE	SPACING
Cover statement	90-110	ExtraBold	UPPER	-1
Slide title	44-54	Bold	UPPER	1.5
Sub-heading	28	Bold	UPPER	2
Body	22-24	Regular	Sentence	0
Label / chrome	12-14	Bold	UPPER	2.5

PowerPoint's character spacing is in **points**, not em. Multiply the em value by the font size: at 12pt, .1em → **1.2pt**; at 44pt, .03em → **1.3pt**. **Font → Advanced → Spacing: Expanded By.**

SLIDE MASTERS TO BUILD

1. **Cover** – mark, display statement, corner marks (DOC NO. RL-000-A, REV. A)
2. **Section** – ink fill, SEC.NN chip, uppercase title
3. **Content** – chip + title + slash tag, 2.25pt rule beneath, content area
4. **Quote** – 6pt pink left bar, bold 32pt
5. **Closing** – colophon: ink rectangle left, tri-band right

SHAPE DEFAULTS

- ▶ **Rounded corners** → 0. Use the rectangle, never the rounded rectangle. If you must use a rounded one, drag the yellow handle fully to the left.
- ▶ **Shadows off**. **Format Shape → Effects → Shadow → No shadow**, on every element. Then right-click a correctly-formatted shape → **Set as Default Shape**.
- ▶ **Hard offset instead**: duplicate the shape, fill with an accent, send backward, nudge right 4px and down 4px.
- ▶ **Lines**: 2.25pt structural, 0.75pt dashed dividers.

TRI-BAND

Rectangle → **Format Shape → Fill → Gradient**, angle **105°**, six stops: pink @0%, pink @36%, marigold @36%, marigold @64%, teal @64%, teal @100%. The doubled stops are what make the boundaries hard.

SEC.04

4 • WORD

Modify the built-in styles so they carry the brand – don't apply direct formatting.

STYLE	FONT	SIZE	WEIGHT	COLOUR	CASE
Title	JetBrains Mono	28	Bold	Ink	UPPER
Heading 1	JetBrains Mono	20	Bold	Ink	UPPER
Heading 2	JetBrains Mono	16	Bold	Ink	UPPER
Heading 3	JetBrains Mono	13	Bold	Ink	UPPER
Normal	JetBrains Mono	10	Regular	Ink	Sentence
Caption	JetBrains Mono	8	Bold	Ink 65%	UPPER

Line spacing 1.5, space after 8pt, margins 20mm. Page colour **#F6F1E7** – but note Word won't print a background colour unless **Options → Display → Print background colours and images** is on. For anything going to press, put the bone on the stock instead (`../docs/08-print.md` RL-BRAND-001-PRINT).

- ▶ **Header:** **DOC NO. RL-000-A** left, **REV. A** right, 8pt
- ▶ **Footer:** **© 2026 RIPOSTE LABORATORIES INC.** left, page number right, 8pt
- ▶ **Rules:** a paragraph border, **1.5pt** – Word's default horizontal line is a hair-line and disappears
- ▶ **Callouts:** 1×1 table, shading **#EAE4D6**, left border 6pt marigold, others none
- ▶ **Tables:** header row **#EAE4D6**, uppercase bold, 1.5pt bottom border; 0.5pt dashed

between rows

SEC.05

5 • EXCEL

- ▶ Header row: ink fill, bone bold uppercase text
- ▶ No banded fills. A 0.5pt bottom border per row instead
- ▶ Conditional formatting: pass #12B795, warn #FE9A0D, fail #F0477D, always paired with a ✓ ! × glyph in an adjacent column
- ▶ Charts: theme accents 1-3 give the rotation automatically. Turn off gridlines, gradients, 3-D and shadows. Set every series border to 2.25pt ink

SEC.06

6 • CHECKLIST

- ☐ Riposte.thmx built and applied
- ☐ JetBrains Mono installed or embedded (or Consolas, noted)
- ☐ Rounded corners 0; default shape set
- ☐ Shadows off everywhere
- ☐ Lines $\geq 1.5\text{pt}$
- ☐ Accents 1-3 in rotation order so charts inherit it
- ☐ Colophon on the last slide / in the footer
