DOC NO. RL-BRAND-001-GWS-A REV. A RIPOSTE LABORATORIES

Google Workspace can't upload fonts and its theming is shallow, so this is the most compromised surface the brand runs on. Build the templates once, then copy them.

SEC.01

1 • FONT

Google Fonts includes **JetBrains Mono**, but it isn't in the Docs/Slides font menu by default. Add it:

Font dropdown → More fonts → search "JetBrains Mono" → add.

If it doesn't appear on your account, use **Roboto Mono** – natively available and the safest cross-platform fallback. Note the substitution when you share the file.

SEC.02

2 • CUSTOM COLOURS

Google's colour picker has no palette import. Enter hex values once via **Custom → hex field** and they'll stay in your recent-colours row for that document. Copy the finished document rather than re-entering them.

INK	#1D1A17	BONE	#F6F1E7
INK RAISED	#241F1B	BONE DIM	#EAE4D6
INK LINE	#5C554C	WHITE	FFFFFF
PINK	#F0477D	PINK DEEP	#D81150
MARIGOLD	#FE9A0D	MARIGOLD DEEP	#A15E01
TEAL	#12B795	TEAL DEEP	#0C7A63

Text on accent fills: bone on pink, **ink on marigold**, bone on teal – and only at large uppercase sizes. Body copy on a coloured fill needs a **DEEP** colour underneath it.

3 • SLIDES

Slide → Edit theme – do this once, then reuse the deck as a template.

THEME SETUP

SETTING	VALUE
Page size	Widescreen 16:9
Background	#F6F1E7
Text	#1D1A17
Font	JetBrains Mono (or Roboto Mono)

TYPE ON A 1920×1080 SLIDE

ROLE	SIZE	WEIGHT	CASE
Display / cover statement	90-110	Bold	UPPER
Slide title	44-54	Bold	UPPER
Sub-heading	28	Bold	UPPER
Body	22-24	Regular	Sentence
Label / chrome	12-14	Bold	UPPER

Google Slides has **no letter-spacing control**. Two options for the tracked chrome:

1. Type spaces between characters: S E C . 0 3. Ugly to edit, right on the eye.
2. Accept untracked labels. Better than faking it with a different font.

SLIDE FURNITURE

- ▶ **Corner marks:** a 12pt text box top-left DOC NO. RL-000-A, top-right REV. A, bottom-right the slide number. 75% opacity.
- ▶ **Checker band:** insert assets/patterns/checker-band.png (or build a 22px square, group a 2×2, duplicate across).
- ▶ **Section dividers:** full-bleed ink rectangle, bone title. This is the ink field.
- ▶ **Corner rounding:** 0. Shape options → shape → the square, never the rounded rectangle.
- ▶ **Shadows off.** Format options → uncheck Drop shadow, on every element.

MASTER SLIDES TO BUILD

1. **Cover** – mark, display statement, corner marks
2. **Section** – ink field, SEC.NN chip, uppercase title
3. **Content** – SEC.NN chip + title + slash tag, 2px rule, content area
4. **Quote** – 8px pink left bar, bold 32pt, attribution below
5. **Closing** – colophon: ink cell left, tri-band cell right

5 • SHEETS

- ▶ Header row: #1D1A17 background, #F6F1E7 bold uppercase text
- ▶ Banding: off. Use a 0.5pt bottom border per row instead – the brand separates with rules, not fills
- ▶ Conditional formatting: pass #12B795, warn #FE9A0D, fail #F0477D – always with a ✓ ! × glyph in an adjacent column, never colour alone
- ▶ Charts: flat accent fills in rotation, no gradients, no 3-D, no drop shadows, gridlines off
