

CANVA

DOC NO. RL-BRAND-001-CANVA-A REV. A RIPOSTE LABORATORIES

Canva can't import a swatch file, so this is a copy-paste setup. Fifteen minutes once, then every future design starts on-brand.

CONTENTS

▶ 1 • Brand Kit – colours	2
Palette 1 – RIPOSTE / BASE	3
Palette 2 – RIPOSTE / ACCENT	3
Palette 3 – RIPOSTE / ACCENT DEEP	3
▶ 2 • Brand Kit – fonts	4
▶ 3 • Canva letter-spacing conversion	5
▶ 4 • The three things Canva gets wrong by default	5
Rounded corners → set to 0	5
Shadows → off	6
Font suggestions → ignore	6
▶ 5 • Rebuilding the signature patterns	6
Tri-band (page heads, footer cell)	6
Checker band	7
Harlequin band	7
▶ 6 • Logo	8
▶ 7 • Sizes for common Canva artboards	8
▶ 8 • The colophon	9
▶ 9 • Setup checklist	9
▶ 10 • Per-design checklist	10

SEC.01

1 • BRAND KIT – COLOURS

Brand → Brand Kits → Add new → Colour palette. Create three separate palettes so the rotation rule stays visible in the picker. Add colours by clicking **+**, then pasting the hex including the **#**.

PALETTE 1 – RIPOSTE / BASE

#1D1A17
#241F1B
#2B2723
#5C554C
#F6F1E7
#EAE4D6
#FFFFFF

PALETTE 2 – RIPOSTE / ACCENT

Add these **in this order**. Canva shows palette colours in insertion order, and the order **is** the rotation rule: pink → marigold → teal.

#F0477D
#FE9A0D
#12B795

PALETTE 3 – RIPOSTE / ACCENT DEEP

For any accent surface that has to carry a **sentence**.

#D81150
#A15E01
#0C7A63
#04463A

The rule you will break first. Bone text on the bright pink or teal is **brand-correct** but only legible at large uppercase sizes. The moment coloured fill sits under a paragraph, switch the fill to a DEEP colour. On marigold, use **ink** #1D1A17 text – never bone. Details: ../docs/07-accessibility.mdRL-BRAND-001-A11Y.

SEC.02

2 • BRAND KIT – FONTS

Brand → Brand Kits → Fonts → Upload a font. (Requires Canva Pro. JetBrains Mono is SIL OFL licensed, so uploading and embedding it is explicitly permitted.)

1. Download from jetbrains.com/lp/mono – or use the `.ttf` files from the JetBrains release.
2. Upload **Regular (400)**, **Bold (700)** and **ExtraBold (800)**. Just those three.
3. Set Brand Kit font styles:

CANVA SLOT	FONT	SIZE (1080×1080)	SETTINGS
Heading	JetBrains Mono Bold	64	ALL CAPS, letter spacing 30
Subheading	JetBrains Mono Bold	32	ALL CAPS, letter spacing 80
Body	JetBrains Mono Regular	28	Sentence case, spacing 0 , line height 1.55

No Canva Pro? Use **Space Mono** – closest in flavour. Then Roboto Mono, then Courier Prime. Never Arial, Montserrat, or anything Canva suggests. Note the substitution when you share the file.

SEC.03

3 • CANVA LETTER-SPACING CONVERSION

Canva's letter-spacing slider is in units of 1/1000 em, so multiply the CSS value by 1000:

ROLE	CSS	CANVA
Display	<code>-.01em</code>	-10
Headings	<code>.03em</code>	30
Nav / buttons	<code>.08em</code>	80
Labels, doc numbers	<code>.1em</code>	100
Slash tags, corner marks	<code>.14em</code>	140
Spec headers, stamps	<code>.16em</code>	160
Page-head kickers	<code>.3em</code>	300
L A B O R A T O R I E S	<code>.55em</code>	550

SEC.04

4 • THE THREE THINGS CANVA GETS WRONG BY DEFAULT

ROUNDED CORNERS → SET TO 0

Canva rounds corners on many shapes and every image frame. **Radius is 0 in this brand, without exception.** Select the element → corner-rounding slider → **0**. Use the square frame, never the rounded one.

SHADOWS → OFF

Canva's shadow effects are all blurred. The brand has no blur. Turn every shadow off.

To get the brand's hard offset instead: duplicate the shape, fill the copy with the accent, send it backward, nudge it **+4px right and +4px down**. That's **4px 4px 0** – the real effect.

FONT SUGGESTIONS → IGNORE

Canva will offer to "improve" the pairing with a display face. There is no second family.

SEC.05 5 • REBUILDING THE SIGNATURE PATTERNS

Canva has no conic gradients, so build these once and save them as Brand Kit elements.

TRI-BAND (PAGE HEADS, FOOTER CELL)

The only one Canva does natively.

1. Rectangle → **Gradient fill** → **Linear**, angle **105°**
2. Three stops, hard: **#F0477D** at 0-36%, **#FE9A0D** at 36-64%, **#12B795** at 64-100%
3. Drag the stops so there's **no visible blend** – Canva will try to smooth them. Place two stops of the same colour adjacent at each boundary if it won't hold a hard edge.

CHECKER BAND

1. Draw a 22 × 22 px ink square (#1D1A17)
2. Duplicate into a 2×2 block: ink top-left, ink bottom-right, bone (#F6F1E7) on the other diagonal
3. Group, then duplicate across to a strip 26 px tall (22px tile + 2px rule top and bottom)
4. Add 2px ink lines above and below
5. Save to Brand Kit → Elements, named RL / CHECKER BAND

HARLEQUIN BAND

Same method, 34 × 34 px diamonds (the square rotated 45°) alternating #F0477D / #12B795, band height 38 px, 2px ink rules top and bottom.

Band rules: strips only, never large fields. Alternate checker and harlequin down a page. Never two identical bands in a row.

SEC.06

6 • LOGO

Upload all three to **Brand** → **Logos**:

FILE	USE ON
assets/logo/riposte-ink.svg	bone, bone-dim, white
assets/logo/riposte-bone.svg	ink fields, pink fields
assets/logo/riposte-pink.svg	accent moments only

- ▶ **Clear space:** one cap-height of the wordmark on all four sides. Nothing enters it.
- ▶ **Minimum width:** 110px on screen, 28mm in print.
- ▶ Scale proportionally – hold **Shift**. Aspect ratio is 4.528:1.
- ▶ Never recolour, rotate, crop esh out, or put the mark inside a shape.

Full rules: `../docs/04-logo.md` RL-BRAND-001-LOGO.

SEC.07

7 • SIZES FOR COMMON CANVA ARTBOARDS

ARTBOARD	BODY	SUB	HEADING	DISPLAY	MARGIN
Instagram post 1080×1080	28	32	64	120	64
Instagram story 1080×1920	32	36	72	140	80
Presentation 1920×1080	24	28	56	110	80
A4 document	10pt	11pt	20pt	36pt	15mm
Business card 85×55mm	7pt	8pt	—	—	5mm

Spacing on a 1080 artboard: `16px → 24` • `34px → 48` • `64px → 96`. Keep the ratios;

the absolute values scale with the canvas.

SEC.08 8 • THE COLOPHON

Close every multi-page Canva document the same way the website does:

1. A 2px ink rule across the full width
2. Below it, two equal cells, full-bleed:
 - ▶ **Left:** ink fill #1D1A17, bone text – © 2026 RIPOSTE LABORATORIES INC. • ALL RIGHTS RESERVED.
 - ▶ **Right:** the tri-band gradient, ink text, right-aligned, bold – PARRY ♻ RIPOSTE ♻ RECYCLE ♻ REPEAT
3. Both at 11–12px (scaled to artboard), ALL CAPS, letter spacing 100

Save it as a Brand Kit element: RL / COLOPHON.

SEC.09 9 • SETUP CHECKLIST

- ☐ Three colour palettes added, accents in rotation order
- ☐ JetBrains Mono 400/700/800 uploaded (or substitution noted)
- ☐ Brand Kit text styles set with the right letter spacing
- ☐ All three logo files uploaded
- ☐ RL / CHECKER BAND, RL / HARLEQUIN BAND, RL / COLOPHON saved as elements
- ☐ Corner rounding 0 on your default shapes
- ☐ Shadows off

SEC.10

10 • PER-DESIGN CHECKLIST

- ☐ Radius 0 on every element
- ☐ No blurred shadows — hard offsets only
- ☐ Accents rotating pink → marigold → teal, none repeated out of order
- ☐ Ink text on marigold; bone on pink/teal **only at display size**
- ☐ Body copy on a DEEP fill, or on bone/ink
- ☐ Bands are strips, alternating, never large fields
- ☐ Logo clear space respected
- ☐ Colophon on the last page
- ☐ No exclamation marks, numbers bolded — `../docs/06-voice.md` RL-BRAND-001-VOICE
