## SEC.01

# 1 • THE WORDMARK

RIPOSTE set as a blackletter-derived wordmark with **esh** – the checkered jester figure, she/her – integrated into the letterforms, caught mid-riposte.

**She is part of the wordmark, not an ornament attached to it. Never crop her out, never separate her, never redraw her.**

| FILE                         | FILL    | USE ON                     |
|------------------------------|---------|----------------------------|
| assets/logo/riposte-ink.svg  | #1d1a17 | bone, bone-dim, white      |
| assets/logo/riposte-bone.svg | #f6f1e7 | ink fields, pink fields    |
| assets/logo/riposte-pink.svg | #f0477d | accent moments only – rare |

Geometry: `viewBox="0 0 720 159"`, aspect ratio **4.528 : 1**.

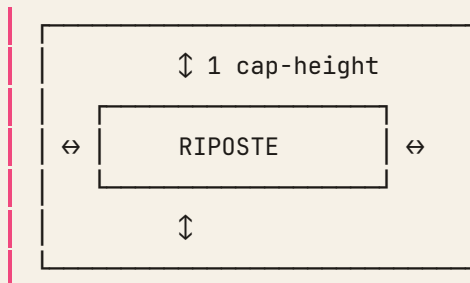

Two harmonic variants exist for hero and sticker use, where esh's checker resolves into a wave field: `riposte-harmonic-ink.svg` and `riposte-harmonic-bone.svg`. And `esh-ink.svg` is esh standalone – for stickers, dies and physical goods only, **not** as a logo substitute.

On ink fields the production site applies filter: `invert(1)` to the ink mark. That is equivalent to `riposte-bone.svg` and is fine; prefer the real file where you can.

## SEC.02

## 2 • CLEAR SPACE

One cap-height of the wordmark on all four sides. Measure from the outermost ink, not from the SVG bounding box – the file carries no padding.

Nothing enters that zone: no text, no rule, no image edge, no checker band. The one sanctioned exception is the **topbar lockup**, where the letterspaced sub-line sits inside the lower clear space by design (see §4).

## SEC.03

## 3 • MINIMUM SIZE

| MEDIUM                          | MINIMUM WIDTH                                            |
|---------------------------------|----------------------------------------------------------|
| Screen                          | 110px                                                    |
| Print                           | 28mm                                                     |
| Embroidery / moulded / engraved | 40mm – below this, use <a href="#">esh-ink.svg</a> alone |

Below the minimum, esh's checker fills merge and the mark turns to mud. There is **no simplified small-size variant** and **no monogram**. If a favicon or app icon is needed, that's an open task – do not improvise one by cropping the wordmark.

## SEC.04

## 4 • THE LOCKUP

RIPOSTE  
LABORATORIES INC.

- ▶ Sub-line: uppercase, weight **400** (not bold – the mark carries the weight)
- ▶ Tracking **.55em** (--tracking-wordmark)
- ▶ Cap height  $\approx 1/8$  of the wordmark's cap height
- ▶ **Optically centred.** .55em tracking adds trailing space after the final character, so subtract about half the tracking from the right or it sits visibly left of centre.

**Topbar variant** (production site): mark at **110px**, then a stacked cell – **Laboratories Inc.** over **RL-000 • Rev.A** – separated by a dashed interior rule. This is the only lockup that pairs the mark with document-control chrome.

## SEC. 05

## 5 • BACKGROUNDS

| BACKGROUND              | MARK                                                                                                      |
|-------------------------|-----------------------------------------------------------------------------------------------------------|
| bone / bone-dim / white | riposte-ink.svg                                                                                           |
| ink field               | riposte-bone.svg                                                                                          |
| pink field              | riposte-bone.svg                                                                                          |
| marigold or teal fill   | riposte-ink.svg – but reconsider; the mark doesn't belong on a small accent fill                          |
| Photograph              | Only on a flat, high-contrast, near-monochrome area. Otherwise put the mark on a bone or ink block first. |

**Hero treatment:** the mark may take `-mark-drop` (`drop-shadow(5px 5px 0 rgba(234, 228, 214, .9))`) – a hard bone-dim offset, no blur. Hero fields only, once per page.

## SEC.06

## 6 • MISUSE

---

Do not:

- ▶ **Recolour** it outside the three fills. No gradients. No photo fills. No outline-only.
- ▶ **Distort** it. Scale proportionally; the aspect ratio is 4.528:1 and stays there.
- ▶ **Rotate** it. The only rotation in the system is .stamp at -2deg, and that's a stamp.
- ▶ **Crop** esh out, isolate her **as the logo**, or redraw her.
- ▶ **Add effects** – glow, bevel, blur, drop shadow other than -mark-drop.
- ▶ **Re-typeset** it. The wordmark is artwork, not JetBrains Mono. Never set "RIPOSTE" in the brand font and call it the logo.
- ▶ **Put it inside a shape**. No circles, no rounded containers, no badges. Radius is 0 and the mark needs no holder.
- ▶ **Pair it with another wordmark** without a 2px ink rule and one clear-space unit between them.

## SEC.07

## 7 • COMPANY NAME IN TEXT

---

- ▶ Full legal: **Riposte Laboratories Inc.**
- ▶ Second reference: **Riposte Labs**, or **Riposte**
- ▶ Never: "RipostéLabs", "riposte labs" mid-sentence, "RL" as a standalone brand
- ▶ Products: **Plastic Works** (injection moulding), **Project HEX** (battery tiles) – title case, both, as proper nouns
- ▶ **esh** is lowercase, always, even sentence-initial. She/her.
- ▶ Domain: `ripostelabs.xyz`
